Show Control Systems are the backbone of today's entertainment technology. These systems are designed to direct the overall experience of the attraction, interface with the special effects, animation, audio, video, and lighting used in today's complex theme park attractions.

ITEC Entertainment has been designing, fabricating, programming and integrating Show Control Systems for themed attractions since 1985 for theme parks around the world.

ITEC's Show Control Systems are designed to make it simple and intuitive for Operators and Maintenance Staff to operate and maintain the attraction.

Extensive diagnostics and reliable equipment ensure an absolute minimum amount of downtime for the attraction and absolute maximum amount of fun for the guests.

Our show control experience covers a wide variety of themed attractions from live-actor action stunt shows to ride venues with world-class animated figures and effects.
